Professional Summary

Motivated Computer Science graduate with practical internship experience at the National AI Center (SDAIA). Proven ability to develop secure desktop applications using Python, PyQt, and AWS. Skilled in database management, cybersecurity fundamentals, and integrating multi-factor authentication systems. Eager to contribute technical expertise to a professional software engineering team.

Professional Experience

Software Engineer Intern National AI Center (SDAIA) | Riyadh, Saudi Arabia 2025 (2-Month Cooperative Training)

- Developed a customized software tool to assist the team in streamlining internal workflows, significantly improving process efficiency.
- Collaborated with cross-functional team members to identify operational bottlenecks and implement effective technical solutions.
- Conducted software testing and troubleshooting to ensure application stability and maintain high-quality standards.

Education

- Bachelor of Computer Science, Graduated 2026 – Majmaah University

Training Courses

- Programming Languages: Python, C++ | University & Online Resources
- Web Development (HTML, CSS, JavaScript) | University & Online Resources
- Databases and SQL | University & Online Resources
- Introduction to Cloud Computing | Online Resources

Projects

Secure File Management System (Desktop Application) Technologies: Python, PyQt, MySQL, AWS S3, OpenCV

- Developed a high-performance secure desktop application using Python and PyQt with a focus on usability and security.
- Implemented robust Multi-Factor Authentication (MFA) including password-based login and facial recognition using OpenCV.
- Integrated AWS S3 services to enable secure cloud storage for files (images, videos, documents) with automated classification.

Database Management Tool Technologies: SQL, MySQL

- Built a specialized application focused on database structuring and management.
- Executed MySQL queries and optimization techniques to ensure data integrity and performance.

Skills

Technical Skills

- Languages: Python, C++, JavaScript, SQL (MySQL), HTML, CSS.
- Frameworks & Libraries: PyQt, OpenCV.
- Cloud & Tools: AWS (S3), Git, GitHub, VS Code.
- Concepts: Database Design & Management, Cybersecurity Fundamentals, Software Testing, Object-Oriented Programming (OOP).

Soft Skills

- Problem Solving, Team Collaboration, Time Management, Adaptability, Effective Communication.

Languages

- Arabic:** Native
- English:** Advanced
